Sourena Nouri

Senior C# Developer

Greater Montreal Metropolitan Area | 5149748848 | nouri.sourena@gmail.com | LinkedIn | GitHub

SUMMARY

Experienced Software Developer with expertise in building scalable and secure .NET/C# applications utilizing Azure Service integration, RabbitMQ, Docker, and Kubernetes. Significant experience in developing RESTful APIs and implementing SQL Server optimizations for high-performance systems. Proven ability in managing cloud deployments and adhering to software development best practices, including Test Driven Development (TDD) and Web security, ensuring reliable and efficient solutions in Azure environments.

EXPERIENCE

AI Automation Consultant 05/2025 - 05/2025
Contract Montreal

- Engineered and shipped an AI-native Azure Architect Agent capable of transforming infrastructure requirements into deployable Terraform modules and technical documentation.
- Leveraged AI agents for automated generation of infrastructure designs, implementation code, and unit/integration test scaffolding using C#, accelerating end-to-end product validation cycles.
- Rapidly prototyped MongoDB + OpenAI solutions to validate data processing and retrieval strategies, incorporating containerization with Docker.
- Built AWS/Azure infrastructure demos using Terraform to demonstrate secure and production-ready deployment patterns adhering to containerization best practices.
- Integrated SAP Commerce Cloud with Oracle Eloqua using event-driven messaging (Azure Service Bus / RabbitMQ) to improve reliability and observability, enhancing backend architecture.
- Moved directly from ambiguous problem statements to working implementations using AI as the default execution approach, rapidly iterating based on stakeholder feedback and validating both functional and non-functional requirements with Test Driven Development principles.

Senior Programmer Analyst / System Architect 03/2022 - 04/2025
Future Electronics Montreal

- Decomposed complex and ambiguous business requirements into solvable components, designing scalable cloud microservices using C#/.NET that improved system performance by 20%.
- Architected robust C#/.NET backend services for high transaction processing, enhancing operational resilience and adhering to microservices patterns.
- Designed secure API services utilizing OAuth and web security best practices, focusing on RESTful APIs and containerization with Docker.
- Implemented Azure Service Bus and RabbitMQ integration for asynchronous workflows, improving backend architecture.
- Enhanced SQL Server/PostgreSQL efficiency through indexing and caching solutions, applying performance tuning techniques.
- Established compliant CI/CD workflows with Kubernetes for automated deployments, optimizing release processes.

Software Developer 08/2021 - 04/2022
Income Access, A Paysafe Company Montreal

- Constructed secure .NET/C# backend services for financial data processing, ensuring compliance with industry standards and web security best practices.
- Improved database and application code performance by 30% through SQL Server optimizations and applied performance tuning strategies.
- Delivered reusable, distributed cloud components utilizing Docker for streamlined operations in Azure environments.

System Integration Architect 08/2020 - 08/2021
Datex Corporation Montreal

- Designed robust RabbitMQ workflows for reliable enterprise messaging, enhancing system communication and backend architecture.
- Developed scalable APIs with C# and ASP.NET for consistent data sharing across platforms, implementing microservices principles.
- Spearheaded Agile delivery initiatives for integration projects using Test Driven Development, ensuring timely and efficient project completion.

.NET Software Developer 03/2018 - 08/2020
Datex Corporation Montreal

- Engineered .NET applications with effective database integration, focusing on SQL Server performance tuning and application reliability.
- Enhanced SQL solutions for efficiency and reliability, contributing to overall system stability through optimization techniques.
- Contributed to iterative Agile delivery frameworks and CI/CD pipelines, promoting continuous improvement in development workflows.

BI Developer 06/2017 - 03/2018
Datex Corporation Montreal

- Built business intelligence solutions leveraging SQL Server to optimize decision-making processes for stakeholders.
- Generated insightful SQL reports delivering actionable insights, improving data-driven strategies and utilizing performance tuning.
- Streamlined data workflows reducing reporting time by 25%, enhancing operational efficiency through optimized data extraction and processing.

EDUCATION

AEC - Programmer Analyst 2016 - 2017
Collège LaSalle

Bachelor's degree - Computer Science -
Azad University (IAU)

SKILLS

C#/.NET .NET Applications, .NET Framework, ASP.NET, C#
Microsoft Azure Azure Service Bus, Azure Service Integration, Cloud Deployments, Cloud Microservices
AWS AWS, Infrastructure Demos
Terraform Azure Architecture Agent, Infrastructure as Code
CI/CD CI/CD Workflows, Release Processes
SQL Server SQL Optimizations, SQL Reports, Database Integration
PostgreSQL PostgreSQL
MongoDB Data Processing, Data Retrieval
RabbitMQ Enterprise Messaging, Event-Driven Messaging
RESTful APIs API Development, API Security
AI/LLM Development AI Agents, AI Technologies, Generative AI, Large Language Models (LLMs), LLM-based Reasoning
OpenAI API API Integration, OpenAI
Data Processing & Retrieval Data Interpretation, Data Retrieval Strategies, Embedding-Based Retrieval
Microservices Architecture Cloud Architecture, Microservices, Scalable Systems
High-Performance Systems High Performance, High Transaction Processing, Scalability, System Optimization
Software Development Best Practices Best Practices, Efficient Solutions, Reliable Solutions, SDLC
Observability Logging, Monitoring
OAuth OAuth, API Security, Security Best Practices
Agile Methodologies Agile, Iterative Development, Scrum
SAP Commerce Cloud SAP Commerce Cloud, Integration
Oracle Eloqua Oracle Eloqua, Integration
Business Intelligence Data Analysis, Reporting
Containers & Orchestration Containerization, Docker, Kubernetes
Backend Development Backend Architecture, Full Stack Development, Go
Testing Test Driven Development, TDD
